## **DETAILED ACTION**

## **REASON FOR ALLOWANCE**

1. After further search and thorough examination of the present application claims 1-19 are found to be in condition for allowance over the prior art of record.

The following is an Examiner's statement of reasons for allowance: the claimed invention relates to cellular wireless communication system; and more particularly to the processing of data communications received by a wireless terminal in such a cellular wireless communication system.

The first cited reference, Fukasawa et al (U.S. Pat. 4,701,923) disclose an adaptively coded data communication system with half duplex and full duplex function. The second cited reference, Dudley et al. (U.S. Pat. No. 5,754,754) discloses a transmission order based selective repeat data transmission error recovery system.

However, none of the cited references either singular or in combination discloses "a system for implementing Incremental Redundancy (IR) operations in a wireless receiver comprising: at least one processing device that is operable to receive analog signals corresponding to a data block, to sample the analog signals to produce samples, to equalize the samples to produce soft decision bits of the data block, and to initiate IR operations, the at least one processing device operable to perform a substantial portion of Physical (PI-IY) layer operations and the Media Access Control (MAC) layer operations of the system, to investigate whether IR operations are required for the soft decision bits of the data block, and to initiate IR operations based upon the investigation."

These limitations, in conjunction with all other limitations of the base claims were not

Art Unit: 2112

shown by, would not have been obvious over, would have been fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

2. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks, Washington, D.C. 20231

or faxed to: (703) 872-9306 for all formal communications.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fritz Alphonse, whose telephone number is (571) 272-3813. The examiner can normally be reached on M-F, 8:30-6:00, Alt. Mondays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacques Louis-Jacques, can be reached at (571) 272-6962.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-3824

Information regarding the status of an application may also be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR
